

Huge protests and direct action are planned at the UN climate summit in December which has the task of negotiating the state/corporate 'solution' to climate change.

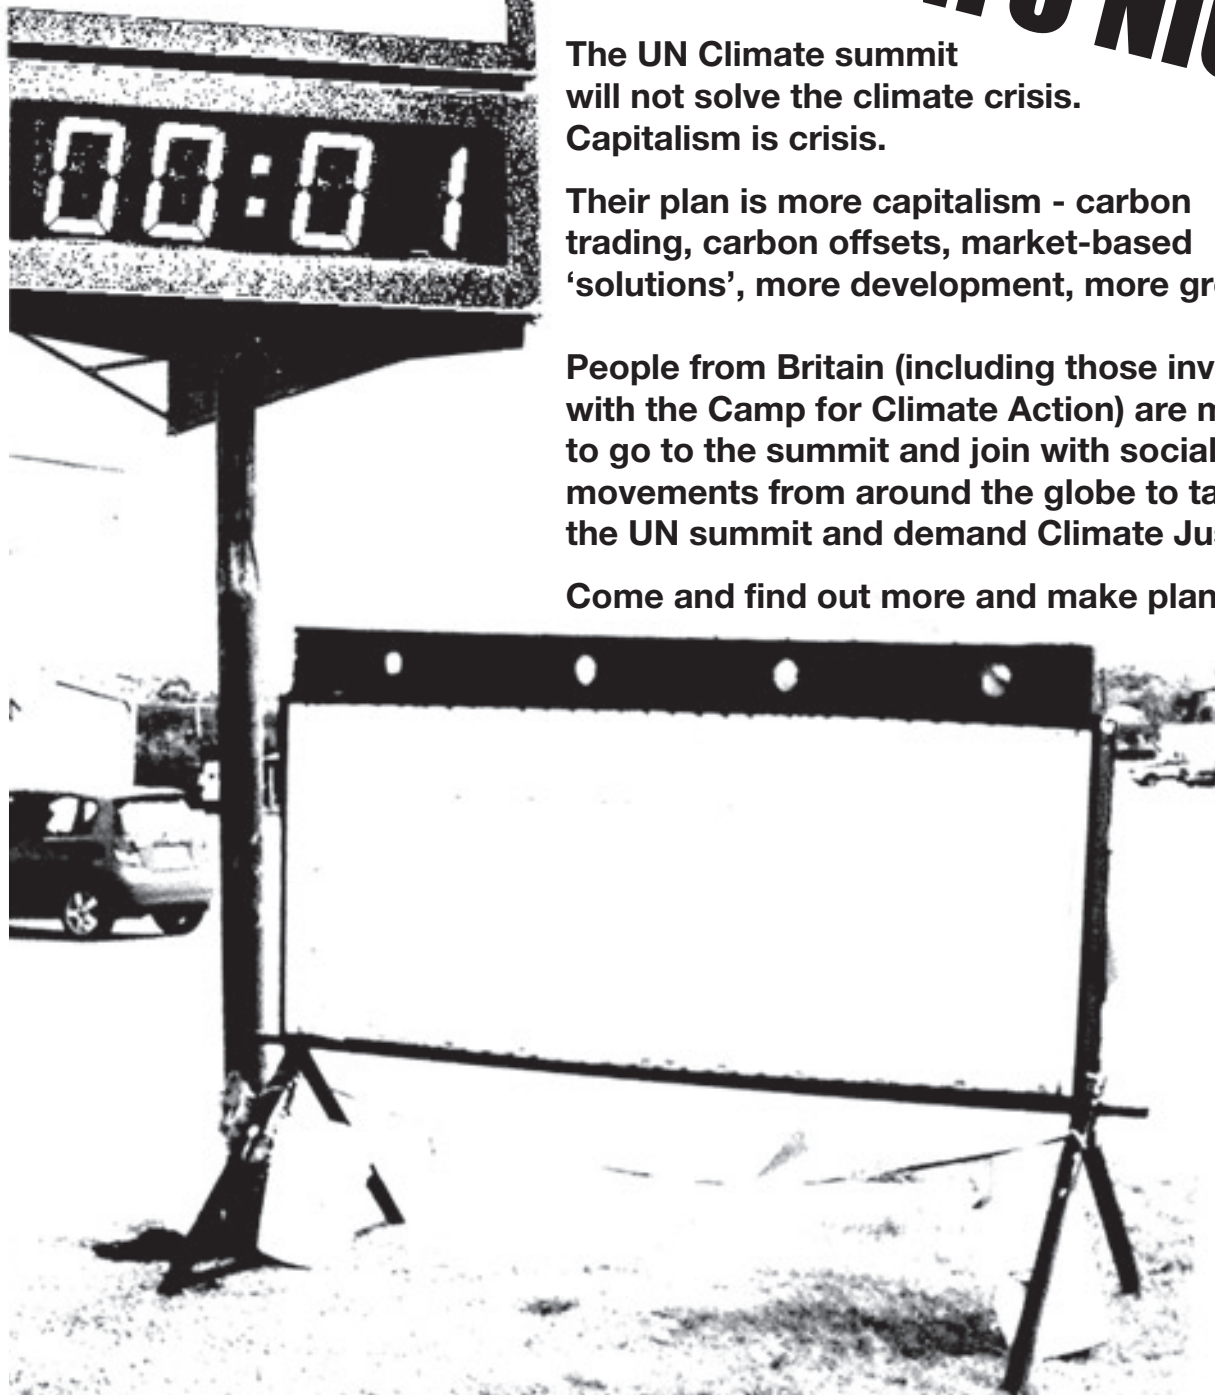

COPENHAGEN 2009 CLIMATE SUMMIT INFO NIGHT

The UN Climate summit will not solve the climate crisis. Capitalism is crisis.

Their plan is more capitalism - carbon trading, carbon offsets, market-based 'solutions', more development, more growth.

People from Britain (including those involved with the Camp for Climate Action) are mobilising to go to the summit and join with social movements from around the globe to take over the UN summit and demand Climate Justice.

Come and find out more and make plans.
