

www.glasgowcriticalmass.org.uk

We're sorry if you are being held up by the Critical Mass Bike Ride, but at least we'll be gone in a few minutes.

We are bringing people's notice to the chaos that characterise our transport system. We need alternatives that allow people to escape from their metal cages and indulge in an environmentally safe and healthy movement.

This will clear the roads for those who REALLY NEED TO USE THEM. We are sure that most of the cars on the road are on really important journeys that could not be done any other way. Well, 39% of them anyway.

You see 61% of all car journeys are less than 5 miles.
26% of car journeys are less than 2 miles - 2 miles ! ! ! !
That would take 10 minutes on a bike.

And the cost of all this includes all of the following:
Global Climate Change (noticed any funny weather?)
Increasing air pollution and associated diseases.
Oil fuelled global terrorism.

A less active and unfit population.

Loss of safe play areas for children.

Huge profits for the planet's most destructive companies.

Please help us. Join the Critical Mass on the last Friday of every month, meet at George Square

5.30 pm for 6 pm...and globally....
