

HACKMEET 2.2

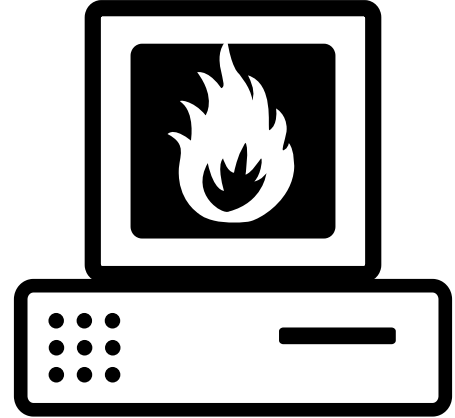

SERVER SECURITY AND HOW TO KEEP RADICAL SITES SAFE

Servers hosting radical websites and services face an ever-growing list of threats, ranging from right-wing hax0rs and DDOS attacks to wiretaps, grand jury subpoenas and server seizure. Hackmeet calls for sysadmins, hackers, and 'net freedom fighters to join a discussion about server security threats, techniques and best practices in the context of social movements, such as Occupy Wall Street, which face surveillance and government repression both in the streets and online.

FEB 18 AT THE HOLDOUT
12-5 PM · 2313 SAN PABLO AVE., OAKLAND
